

WIRELESS SOUND ROOM MONITOR

EARWARE

Model SRM-1000

- Communicate with Assistants in the Sound Room
- Coordinate Testing Procedures for Best Results
- One-Way communication from tester to assistant
- Ear Level Hands-Free –NO WIRES!
- Interference Free –Excellent Sound Quality
- Recharging Base for both Units

Miniature wireless communication system consists of a lapel transmitter and ear level ear-piercer is compact and easy to use offering hands-free communication to an assistant or caregiver in the sound room during testing. Miniature wireless transmitter can be worn or placed on the desk for clear communication. Comes complete with AC charger /storage base for up to 4 hours of continuous use before unit needs recharging. Wireless Bluetooth transmission offers excellent sound quality over a 30 foot range

RECEIVER

The wireless Bluetooth receiver is a lightweight ear level speaker that is unobtrusive and easy to wear. A small volume control allows for adjustments in loudness levels. Interference-free wireless operation throughout the testing area.

TRANSMITTER

The micro-miniature transmitter has built in sensitive microphone to pick up voices within the sound room. Comes with clothes clip to attach to pocket or lapel for hands-free operation.
